### **AIRAM UNVEILS NEW WEBSITE**

Covington, Ohio—(February 3, 2009) AIRAM® Press Co. Ltd., a leading pneumatic press manufacturer, has unveiled a new website [www.airam.com](http://www.airam.com) designed to give stampers a comprehensive resource for flexible, cost effective metalforming. Streamlined navigation allows visitors to easily access and look at the press builder's diverse product line 3 to 210 tons.

New sections and expanded features break down AIRAM presses by model (B, P and G Series) and application from general and progressive die stamping to rollforming, lamination notching, scrap chopping, blanking, steel rule die cutting, plastics, paper, transfer and servo feed lines, and multiple press configurations on a single bed. In the current climate, AIRAM's website helps stampers quickly match their production requirements with the most efficient solutions.

Easy access to AIRAM's comprehensive replacement/spare parts inventory ensures a fast response time. Ordering can be done securely online. Customers simply need the press model, serial number, part number or description and the name of the part from their manual. For stampers that don't have that information, AIRAM's new website provides size guide post hotlinks to help visitors quickly locate the part they need. Domestic repair parts can be shipped the same day for orders faxed or emailed before 2:00 p.m. EST. Like its press production solutions, AIRAM's new website gives stampers the tools they need to compete in today's global economy.

AIRAM's leadership and technical staff offer extensive experience, technical knowledge and in-depth application engineering expertise to help customers select the right production system. In addition to the press, AIRAM stamping solutions include the die, feeding equipment, part handling automation and other ancillary equipment. Stock presses, including special press sizes, the capability to economically custom engineer press models, a comprehensive spare parts inventory, rebuild and preventative maintenance programs provide key customer support services. Committed to equipping customers with the tools they need to be competitive, AIRAM offers flexible production systems in tandem or stand alone configurations with the capability to manufacture quality parts at low cost.
